MOHAN KUMAR C

Full Stack Developer

mohankumar23clg@gmail.com | 8637690735 | LinkedIn | GitHub

OBJECTIVE

Computer Science and Engineering student with hands-on experience in full-stack development, data analytics and AI/ML. Skilled in Java, Python, JavaScript, TypeScript, React.js, Node.js, SQL and Power BI, with practical experience in developing database-driven applications, analyzing datasets and building machine learning solutions. Seeking a Full Stack Developer role to apply programming, analytical and problem-solving skills.

EDUCATION

Jeppiaar Institute of Technology **2023 – Present**
B.E. – Computer Science and Engineering

Sri Venugopal Vidyalaya M.H.S School **2022 – 2023**
HSC

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript
Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs
Database: MySQL, DBMS
Data & AI: Pandas, NumPy, Power BI, Scikit-learn, Data Analysis, Data Cleaning, Data Visualization, Machine Learning
Core CS: OOP, Data Structures & Algorithms
Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook

INTERNSHIPS

TVK Technology – Java Full Stack Developer Intern **26 Aug 2026 – 26 Sep 2026**

- Developed a **Customer Management System** using Java full-stack development and database concepts.
- Implemented customer record management features including adding, updating, viewing and managing customer information.
- Worked with frontend, backend and database integration to build a functional database-driven application.

Imarticus Learning – Technical Training & Project Evaluation **19 Aug 2026 – 17 Sep 2026**

- Completed practical training in **MySQL, Python, Power BI, Profile Grooming and Project Evaluation**.
- Worked on SQL queries, Python-based data analysis and Power BI dashboard development using practical datasets.
- Performed data preparation, analysis and visualization to identify patterns and generate meaningful insights.

LearnFlu – Artificial Intelligence & Machine Learning Intern **Mar 2025 – Jun 2025**

- Worked with **Python** for data preprocessing, data cleaning, exploratory data analysis and feature preparation.
- Applied Python libraries for data analysis and visualization while preparing datasets for AI/ML workflows.
- Worked on model implementation, testing and validation to understand practical machine learning development.

PROJECTS

Customer Management System – Java Full Stack

- Built a database-driven customer management application as part of the **TVK Technology Java Full Stack Developer Internship**.
- Implemented customer data management using Java full-stack concepts, frontend components and database connectivity.
- Designed application workflows for storing, updating and retrieving customer information.

Customer Churn Prediction – TCS iON Applied Industry Project

- Developed a Machine Learning classification model using **Python, Pandas, NumPy and Scikit-learn** to predict customer churn.
- Performed data preprocessing, cleaning, exploratory data analysis and feature engineering on customer datasets.
- Evaluated the model using **Accuracy, Precision, Recall and F1-score** to measure classification performance.

Power BI Data Analytics Dashboard

- Created an interactive **Power BI** dashboard for data visualization, analysis and reporting.
- Cleaned and transformed datasets before creating charts, tables, filters and analytical reports.
- Presented trends and key insights through interactive dashboard visualizations for easier data interpretation.

CERTIFICATES & ACHIEVEMENTS

- **TVK Technology** – Java Full Stack Developer Internship Certificate
- **Imarticus Learning** – MySQL, Python & Power BI Certificate
- **LearnFlu** – Artificial Intelligence & Machine Learning Internship Certificate
- **TCS iON** – Applied Industry Project Certificate: Customer Churn Prediction
- NPTEL – Introduction to Internet of Things (64%)
- CODEZILLA Event – Second Prize
- Web Design Sprint – Second Prize
